94.194

901 ovitus receptor (clone AGW-alpha-1) - green monkey

C.Species: Cercopithecus aethiops (green monkey, grivet)

C.Date: 30-Sep-1993 #sequence_revision 30-Sep-1993 #text_change 09-Jul-2004

C.Accession: A44194

B.Koike, S.; Ise, I.; Sato, Y.; Yonekawa, H.; Gotoh, O.; Nomoto, A.

J. Virol. 66, 7059-7066, 1992

A.Fitles: A second gene for the African green monkey poliovirus receptor that has no puta

A.Reference number: A44194; WUID:93059651; PMID:1331508

Poliovirus receptor related protein 1 precursor (Herpes virus entry mediator C) (HveC) (Nectin 1).

Name=Pvrl1; Synonyms=HveC, Prrl;
          Homo sapiens (Human).
Bukaryota, Metazoa, Chordata, Craniata, Vertebrata, Euteleostomi;
Mammalia, Eutheria, Primates, Catarrhini, Hominidae, Homo.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Eukaryota, Metazoa, Chordata, Craniata, Vertebrata, Euteleostomi,

DISSASS: Defects in PVRL1 are a cause of cleft lip/palate-
ectodermal dysplasia syndrome (CLPED1) [MIM:225000]. CLPED1 is
responsible for allelic forms known as Margarita island ectodermal
dysplasia [MIM:225060] and Zlotogora-Ogur syndrome.
SIMILARITY: Contains 1 immunoglobulin-like C2-type domains.
SIMILARITY: Contains 1 immunoglobulin-like V-type domain.

               cell-cell adhesion
in cleft lip/palate-ectodermal
Helms J.A., Spritz R.A.;
whtataions of PVRL1, encoding a cell-cell adhesion
molecule/herpesvirus receptor, in cleft lip/palate-ectoderm
dysplasia..;
Nat. Genet. 25:427-430(2000).
-!- FUNCTION: Probably involved in cell adhesion. Receptor
alphaherpesvirus (HSV-1, HSV-2 and pseudorabies virus)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Poliovirus receptor related

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
